

MINISTRY OF INFRASTRUCTURE  
State Commission on Aircraft Accident Investigation

Ref. No.: 361/07

## RESOLUTION

of

State Commission on Aircraft Accident Investigation in the following composition:

Deputy Chairman of the Commission:	MSc (Eng.) Andrzej Pussak
Member of the Commission:	D. (Eng.) Stanisław Żurkowski
Member of the Commission:	MSc (Eng.) Jerzy Kędzierski
Member of the Commission:	Eng. Tomasz Makowski
Member of the Commission:	MA Tomasz Kuchciński
Member of the Commission:	MSc (Eng.) Bogdan Fydrych

At the meeting held on 30 March 2011, after examination of investigation results submitted by the SCAAI Investigation Team on serious air incident - clearance for Airbus A320, registration marks TS-INF to take off despite a car on the runway, which occurred on 23 August 2007 at Poznań-Ławica aerodrome (EPPO) - **acting under the Act of 3 July 2002 “Aviation Law” (Journal of Laws 2006, No. 100, item. 696 with amendments)**, the State Commission on Aircraft Accident Investigation considered the investigation as completed and determined that:

**The causes of the serious air incident were:**

1. An ambiguous manner of forbidding Duty Officer by air traffic controller (trainee) to enter the runway.
2. Improper monitoring of radio communication and improper visual control of the runway by ATC staff.
3. Lack of “situational awareness” of the Duty Officer on the runway.

**Safety recommendation:**

The Commission accepted solutions recommended by the Runway Safety Team of EPPO:

1. to check functioning of the communication equipment by service personnel;
2. to introduce refresher training in operating of radio communication equipment;
3. to introduce refresher training in use of radio communication phraseology.

**Signatures of the Commission**
